Experience

Senior Software Engineer, Persistent Systems – Pune (MH)

Oct 2024 - Present

Hawaii Project

Role: Frontend Developer (with backend involvement)

Description: Health Analytics Application (HAP) is a portal evolved by Hawai'i State of US where multiple Tax Reports can be submitted by Submitter or Attester Role and Reviewed by Reviewer or Supervisor Roles.

- Developed reusable and scalable front-end components to enhance maintainability and efficiency.
- Configured functionality-related operations to ensure smooth application performance.
- Resolved CSS issues and optimized the UI for responsiveness across devices.
- Managed and updated content to align with business requirements.

Senior Software Engineer, Persistent Systems – Pune (M.H.)

Oct 2023 - Oct 2024

United Health Group Optum Project

Role: Frontend Developer

Description: Self Service Portal (SSP) evolved for NC is utilized by Health Care Providers and netizens. Here we can search the provider using various features as name, speciality, etc, where we can see the list of providers with map view and additional features based on when a particular Health Care provider is available.

- Developed and maintained front-end components based on business requirements, ensuring responsiveness and usability.
- Wrote Jest test cases to verify component functionality and improve code quality.
- Worked with technologies including JavaScript, React, Jest, HTML/CSS, Git, and Postman.

Software Engineer, **Persistent Systems** – Pune, (M.H.)

Feb 2023 - Oct 2023

Health Insurance Portal Project

Role: Frontend Developer

Description: Build a comprehensive Health Insurance Portal that allows users to explore, compare, and purchase various insurance plans. The platform includes features for user registration, policy management, premium calculation. Focused on delivering a user-friendly interface with secure and efficient data.

- Led the development and maintenance of the Health Insurance Portal, collaborating with stakehlder to define project requirement and timelines.
- Implemented CRUD operations for health insurance data and developed an announcement API to provide updates on policy revision.
- Designed and executed test cases to validate the functionality of the application.
- The application was built using React, JavaScript, MySQL Workbench, HTML, Web Components, and Git to ensure scalability and efficiency.

Software Engineer, Persistent Systems – Pune, (M.H.)

June 2022 - Feb 2023

E-Commerce Project

Role: Frontend Developer

Description: Developed a fully functional E-commerce web application with features like user authentication, product listing, shopping cart, order management. The platform offers a seamless user experience.

- Collaborated closely with the Product Manager and the development team to meet business requirements and deliver efficient results.
- Implemented CRUD operations for product details and designed the User Interface to display product information.
- Developed a feedback functionality to enhance user experience.
- Created and executed test cases to validate the functionality of the application.
- Used React, JavaScript, MySQL Workbench, HTML, Web Components, and Git to build a scalable and efficient web application.

Intern, Persistent Systems-Pune, (M.H.)

Jan 2022 – June 2022

- Strong understanding of technologies like SQL, React, Node.js, HTML/CSS, JavaScript, Java, Git, Postman.
- Used above mentioned technologies to develop applications and ensuring best practice.
- Experienced in version control using Git, maintaining good quality code practice and efficient team collaboration.

Network Developer Intern, Ageis i-net Institute – Jabalpur, (M.P.)

April 2018 - Jan 2019

• Assisted as a Network Engineer in designing network infrastructure, troubleshooting technical issues, and providing documentation support.

Projects

To-Do List Web Application (JavaScript, React, Redux, Styled Component)

• Developed a task management web application to help users organize and track their daily activities efficiently.

E-Commerce Platform (JavaScript, React, Redux, Styled Component)

• Developed a fully functional E-Commerce web application with product management and user authentication.

Real-Time Weather Application (JavaScript, React, React Native, Styled Component)

• Developed a mobile application using React Native to provide real-time weather updates.

Certification

- GitHub Copilot
- Azure AZ-900
